# ANUPAN-DSR

Pantoprazole 40mg & Domperidone 30mg

Capsules

## PANTOPRAZOLE

- Irreversible proton pump inhibitor (PPI) that reduces gastric acid secretion
- Oral pantoprazole is a safe, well tolerated and effective initial & maintenance treatment for patients with nonerosive GERD or erosive esophagitis.

## DOMPERIDONE

- Enhances gastrointestinal peristalsis and motility
- Increases Lower Esophageal Sphincter (LES) tone

● Non Ulcer Dyspepsia

● Chronic Gastritis

● Nausea & Vomiting

● Gastric Ulcer

● Reflux Esophagitis

● GERD

● Acid Regurgitation

● Peptic Ulcer

Also Available

RESPULES

# BUDENSE-1MG

Budesonide Nebulizer Suspension 1mg Respirator Solution

## Asthma

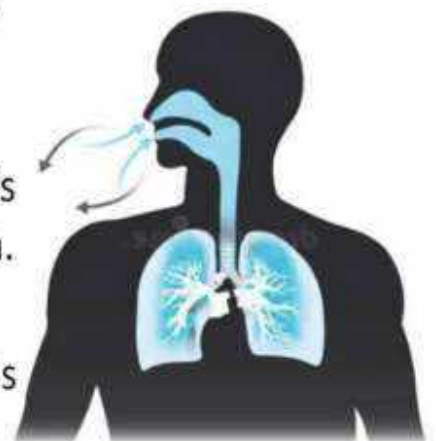

< Its is used in the treatment of asthma which is an inflammation of airways characterized by breathing difficulty.

## Crohn's Disease

< It is used in the treatment of crohn's disease which is an inflammation of the lining of the digestice system.

## Ulcerative Colitis

< It is used in the treatment of ulcerative colitis which is an inflammation of the lining of the large intestine.

Also Available

**BUDENSE-.5** RESPULES

BUDESONIDE NEBULIZER SUSPENSION 0.5 MG respirator Solution

**BUDENSE-LS** RESPULES

BUDESONIDE 0.5 MG + LEVOSALBUTAMOL 1.25 MG respirator Solution

# BUDENSE-FB

Budesonide 0.5mg+Formoterol 20mcg Respirator Solution

**A POWERFUL ANTI-ASTHMATIC AGENT**

## Combination of Budesonide and Formoterol

used to control and prevent the symptoms of asthma in adults and children at least 6 years old.

### Budesonide

- An anti-inflammatory corticosteroid.
- Exhibits potent glucocorticoid activity and weak mineralocorticoid activity.
- Exhibits inhibitory activities in allergic & non-allergic-mediated inflammation.
- Works directly in the lungs to make breathing easier by reducing the irritation & swelling of the airways.

### Formoterol

- A long-acting bronchodilator which works by relaxing the muscles in the airways and widens the airways.

*effective in*

Chronic obstructive pulmonary disease (COPD), including

- Chronic bronchitis
- Emphysema

*Also Available*

**BUDENSE-FB 400**

Budesonide 400mcg + Formoterol 6mcg

Capsules

# ACEBROSUN

Acebrophylline 100/200mg. CAPSULES

- Belongs to category of drug groups primarily affecting the respiratory system drugs.
- 3 Actions namely bronchodilation, mucoregulation & anti-inflammatory action.
- An air way mucus regulator with anti-inflammatory action.
- In chronic obstructive pulmonary disease (COPD)

"The effectiveness of acebrophylline was evaluated either on the basis of subjective symptoms and objective findings on the basis of pulmonary function as determined by using spirometry and blood gas analysis before and at the end of treatment. The results showed an early and positive effect of acebrophylline on the quantity and viscosity of expectoration and consequently a marked improvement in signs and symptoms of patients, with favourable changes in respiratory function."

## ACEBROSUN-N TABLETS

ACEBROPHYLLINE + N-ACETYLCYSTEINE 600 MG

Chronic Obstructive  
Pulmonary Disorder (COPD)

Bronchial Hyper Responsiveness

Bronchial Asthma

## The Synergistic Duo Fits The System

# Cefjon-SB Injections

Cefoperazone 1000mg & Sulbactam 500mg

### Cefoperazone

It is one of few cephalosporin antibiotics effective in treating Pseudomonas bacterial infections which are otherwise resistant to these antibiotics. Cefoperazone is also sold as a co-formulation with sulbactam.

### Sulbactam

Sulbactam is able to inhibit the most common forms of  $\beta$ -lactamase but is not able to interact with the AmpC cephalosporinase. Thus, it confers little protection against bacteria such as Pseudomonas aeruginosa, Citrobacter, Enterobacter, and Serratia, which often express this gene.

### Effective Treatment for :

- Community acquired Pneumonia
- Abdominal infections
- Gynaecological Infections

It can improve autumn depression
- **Helps to form collagen,** for wrinkles and scars.
- **Very healthy for the skin**

Quality Products From  SUNWIN

The Simple Vitamin  
Could save your life...

# C-C Drops

Vitamin C (Ascorbic Acid) 100 mg

Vitamin C promotes a healthy immune system, help wounds heal, maintains blood vessels and connective tissue and aids in the absorption of iron RDA:60 mg

Converts proline to hydroxyproline, which is a constituent of collagen. Involved in collagen synthesis and teeth formation. Acts as antioxidant due to its reducing property.

Deficiency leads to scurvy, defective bone growth, bleeding gums and delayed wound healing. Subperiosteal bleeding and calcification.

- Quintessential Antioxidant
- Helps to form collagen, for wrinkles and scars.
- Very healthy for the skin  
Increase in psoriasis, eczema, if you take the sun, etc.
- Increases good cholesterol
- Improves visual health and prevents cataracts
- Helps build cerebral neurotransmitters  
It can improve autumn depression.

# Colink Dry Syrup

COLISTIN SULPHATE 12.5 MG

POWDER FOR ORAL SUSPENSION FOR PAEDIATRIC USE ONLY

Treatment of **childhood** diarrhoea demands efficacy & compliance

## COLISTIN SULPHATE

Excellent bactericidal activity against most gram-ve pathogens- enteropathogenic E.coli, Shigella, enterobacter, Salmonella and Vibrio.

Established safety profile

### USES :

Used in treatment of diarrhoea in infants and children caused by enteropathogenic E.coli, Shigella, and other susceptible gram negative bacilli.

Used to treat **infections** with anaerobic Bacteria

# Clindamet-300

Clindamycin Capsules I.P. 300mg. **Capsules**

- \* Clindamycin has a primarily bacteriostatic effect. It is a bacterial protein synthesis inhibitor by inhibiting ribosomal translocation, in a similar way to macrolides.
- \* Clindamycin is indicated for the treatment of severe infection caused by susceptible Gram-positive aerobic organisms, staphylococci (penicillinase / and non-penicillinase producing), streptococci (with the exception of Streptococcus faecalis) and pneumococci or by susceptible anaerobic organisms.
- \* Clindamycin is used primarily to treat anaerobic infections caused by susceptible anaerobic bacteria, including dental infections, and infections of the respiratory tract, skin, soft tissue and peritonitis

Clindamycin is an antibiotic useful for the treatment of a number of bacterial infections

- Middle ear infections
- Bone or joint infections
- Pelvic inflammatory disease
- Strep throat
- Pneumonia
- Endocarditis
- Acne

## Clindamet-300

# COGNATE

CEREBROPROTEIN TABLETS  
HYDROLYSATE 90 MG TABLETS

- \* Acts on the central nervous system in various ways to protect neurons and improve memory, attention and vigilance.
- \* Improves acetylcholine function, and modulate the Glutamic acid (Glu)/-Amino Butyric acid (GABA) learning and memory regulation system, reducing excitotoxicity caused by Glu.
- \* Significantly improves the scores of Adenbrook's Cognitive Examination-Revised (ACER) and Mini Mental Status Examination (MMSE).
- \* No major side-effects

## Enhances

- Neurogenesis
- Neuronal survival
- Neuromodulatory action
- Neuronal plasticity
- Neuronal repair

**Vascular dementia**  
**Traumatic brain injury**  
**Acute ischemic stroke**

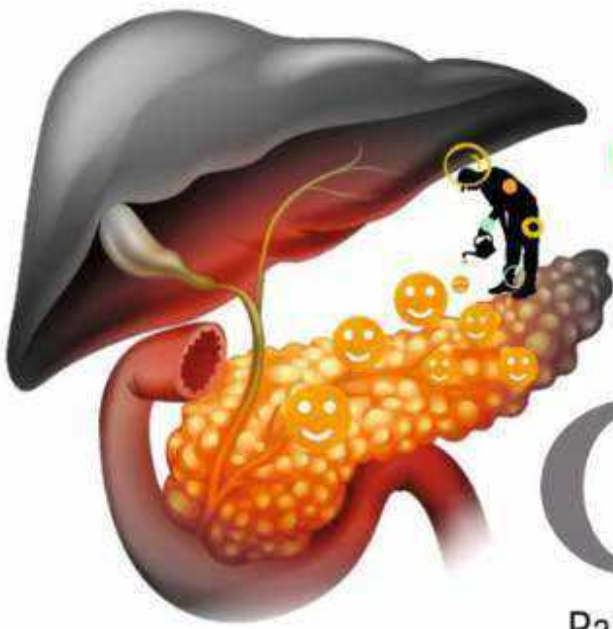

## Neurotrophic activity

- Increased neuroimmunity
- Helps in neuro differentiation
- Protection against ischaemic and neurotoxic lesions and free radicals.

**Alzheimer's diseases**  
**Extrapontine myelinolysis**

*Safe and effective  
Brain rejuvenator*

Quality Products From

# Creonit

Pancreatin 300mg EQ to. ( Lipase 25,000 Ph +  
Amylase 20,000 Ph + Protease 1,000 Ph) Tablets

- Pancreatic enzyme replacement therapy (PERT)
- Treats people who cannot digest food normally because the pancreas does not make enough enzymes.
- Delivers enzymes to the duodenum where the pH is the most conducive to enzymatic activity
- Ensures significant improvement in CFA in patients with EPI due to cystic fibrosis aged 12 to 43 years

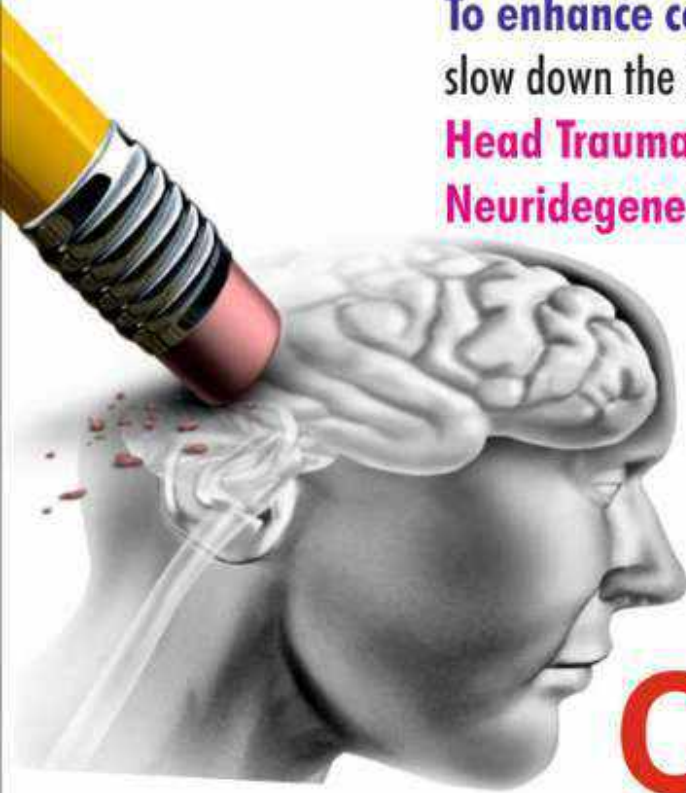

**Exocrine Pancreatic Insufficiency (EPI) Due to**

- **CYSTIC FIBROSIS**
- **CHRONIC PANCREATITIS**
- **PANCREATECTOMY**

To enhance cognition &  
slow down the brain aging in  
**Head Trauma, Stroke &  
Neurodegenerative Diseases**

Quality Products From 

# CLISUN-P

Citicoline 500mg & Piracetam 800mg Tablets

## PIRACETAM

- A cyclic GABA derivative & acts as a cognition enhancer.
- Facilitates the movement of information between the brain's 2 hemispheres via corpus callosum and improves the function of
- Acetylcholine via muscarinic receptors which are implicated in memory process.
- Improves the production of ATP & promotes cerebral metabolism.
- Enhances protein synthesis in the brain.
- Enhances the excitatory neurotransmitter NMDA glutamate receptor which is involved in learning and memory process.

## CITICOLINE

- Increases blood flow and O<sub>2</sub> consumption in the brain. Involved in the biosynthesis of lecithin.
- Involved in the biosynthesis of lecithin.
- Enhances the synthesis of phosphatidyl-choline in brain.
- The extensive damage caused by stroke requires repair & regeneration of the axons & synapses of neurons, so new membrane production is necessary.

**CLISUN-500**  
CITICOLINE 500MG Tablets

**Effective in**

- « Memory enhancement
- « Parkinsonism disorder
- « Alzheimer disorder
- « Neurological and cognitive disorder
- « Depression and anxiety stroke

- « Closed craniocerebral stroke
- « Dyspraxia clotting, coagulation & vasospastic disorders

Mefenamic Acid 250mg + Paracetamol 325mg + Dicyclomine Hcl 10mg Tablets

Mefenamic 500mg + Paracetamol 325mg Tablets

When Paracetamol alone is not enough  
in Pain & Fever

# DORFEN-DS

Suspension

Mefenamic Acid 100mg & Paracetamol 250mg.

### **SAFE ANTIPIRETIC**

- Mefenamic Acid is safe & effective in pediatric patients
- Paracetamol - 2.5 time stronger antipyretic than aspirin

### **FAST ONSET OF ACTION**

- Acts peripherally & centrally to control pain & fever
- Paracetamol promptly controls fever in about 10 minutes

### **LONG DURATION OF ACTION**

- Action of Mefenamic Acid lasts for 8 hours

### **Indication**

- Fever & Pain
- Teeth Pain
- Brings Fever & Pain Down

Also Available

**DORFEN-P** Suspension  
Mefenamic acid 50mg + Paracetamol 125mg

*Brings Fever & Pain Down*

In Luteal support during ART, Threatened Abortion & Maintenance of Pregnancy

# Dygo bliss

10  
20

Dydrogesterone 10mg / 20mg Tablets

## For Future Mother

- Better absorption with negligible side effects
- Longer half life of 10hrs
- Achieves therapeutic endometrial Dydrogesterone concentrations (13.9 mg/ml)

### USES

Treatment of Female infertility  
Treatment of Pain During menstruation  
Treatment of Premenstrual syndrome (PMS)  
Treatment of Endometriosis

### BENEFITS

In Treatment of Female Infertility  
Aids in infertility by preparing the uterine lining for pregnancy. Its also helps in the regulation of the menstrual cycles.  
Increase the chances of successful pregnancy in women who have a history of recurrent abortions.

# DEXBACT-LB

DOXYCYCLINE 100MG WITH LACTIC BACILIUS Capsules

## **Doxycycline**

- ≠ Doxycycline is a broad-spectrum synthetically derived from oxytetracycline.
- ≠ It has a high degree of lipid solubility and a low affinity for calcium binding .
- ≠ It is highly stable in normal human serum.
- ≠ Used only to treat or prevent infections that are proven or strongly suspected to be caused by bacteria.
- ≠ It also may be substituted in place of penicillin to treat common infections in those people who are allergic to that particular drug.
- ≠ It is active against a wide range of gram-positive gram-negative organisms.

## **Lactic Acid Bacillus**

- ≠ Found in decomposing plants and lactic products, produce lactic acid as a major metabolic and product of carbohydrate fermentation.
- ≠ Increased tolerance to a lower pH range.

**ANTIPROTOZOAL • DIARRHOEA  
CONSTIPATION • ANTIBACTERIAL  
ANTIHELMINTHIC • GLOSSITIS**

Chronic Bronchitis ...

Quality Products From  SUNWIN

# Duoforce <sup>TABLETS</sup>

Levosalbutamol 1.25 mg + Ipratropium Bromide 500 Mcg respirator Solution

- Levosalbutamol sulphate is a relatively beta2-adrenergic agent, whose activation leads to an increase in intracellular adenyl cyclase the enzyme which catalyses the conversion of adenosine triphosphate (ATP) to cyclic-3',5' adenosine monophosphate (CAMP).
- Ipratropium bromide is an anticholinergic (parasympatholytic) agent, which inhibits vagally - mediated Reflexes by antagonizing the action of acetylcholine the transmitter agent released from the vagus nerve.
- Allowing effects on both Muscarinic and beta2-adrenergic receptor in the lungs leading to increased bronchodilation over that provided by each agent singly.
- Effectively reduces hospitalisation and improves pulmonary function :
  - A Single course of combination therapy and multiple courses both showed reduction in the risk of hospitalisation among adults with acute asthma.

**INDICATED IN :**

**Lungs Inflammation**

**Shortness of breath / Difficulty in Breathing**

**Treatment of chronic obstructive pulmonary  
Disease COPD in short and Asthma**

*Silences allergies  
once and for all*

# Deslogic-M

Desloratadine 5mg & Montelukast 10mg Tablets

## DESLORATADINE

- Is the active metabolite of loratidine
- Is a new generation antihistamine used in the treatment of allergic disorders
- Superior for alleviating both nasal and non-nasal symptoms of perennial allergic rhinitis

## MONTELUKAST

- Antagonizes the proinflammatory and proasthmatic activities
- Can be used as first-line therapy for AR, with comprehensive improvement of the nasal and ocular symptoms and the quality of life in AR patients

**Asthma | Chronic Urticaria | Allergic Disorders**  
← **Seasonal Allergic Rhinitis | Perennial Allergic Rhinitis** →

Vitamin D3 500 IU+ Zinc 7.5mg **Tablets**

MORE THAN 200 MILLION OF PEOPLE ARE SUFFERING FROM OSTEOPOROSIS  
WORLDWIDE

## Ibandronic Acid

- \* A potent, new-generation, nitrogen-containing bisphosphonate Effectively inhibits osteoblast-mediated bone resorption
- \* Reduces bone resorption & enhances mineralization resulting in an Increases in bone mineral density

## Calcium Carbonate

- \* Provides the highest amount of elemental calcium.
- \* Well absorbed and well-tolerated specially when taken with a meal.
- \* Limited solubility abnd absorption in patients with high gastric pH

## Vitamin D3

- \* Is a crucial co-regulator of bone growth & remodeling, Neuromuscular function, inflammation, proliferation, differentiation & apoptosis of cells

## Zinc

- \* Stimulates cell proliferation & mineralization in osteoblast, promoting bone formation
- \* Plays an important role in the regulation of bone metabolism

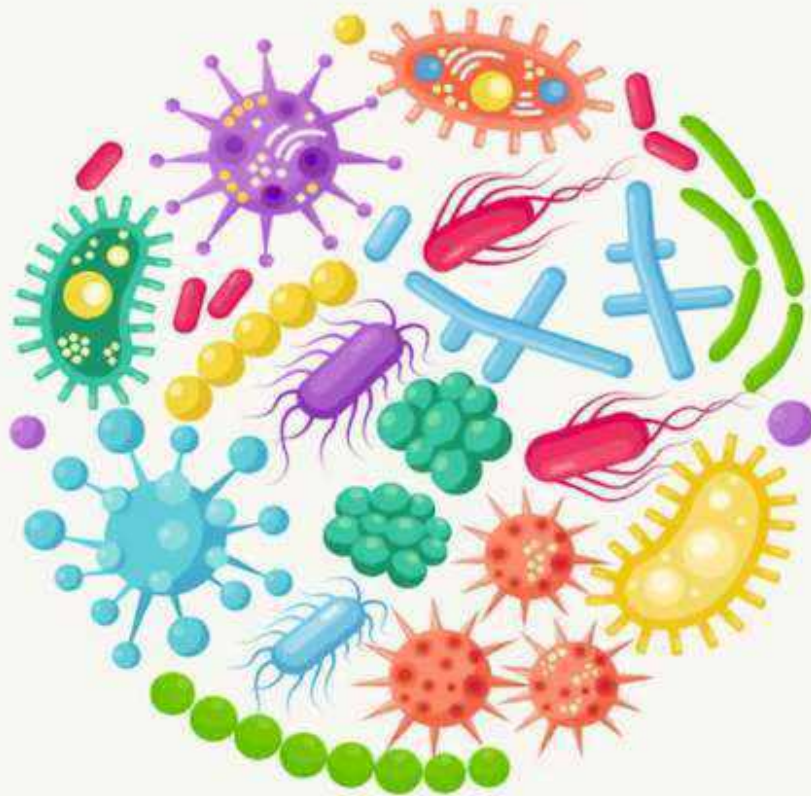

Also  
Available

Polyethylene Glycol + Sodium Bicarbonate + SOLUTION  
Potassium Chloride Concentrate for oral solution

For Regular Bowl Movements & Strain Free Evacuation

Relief from phosphate levels in  
late-stage **Kidney failure**

Quality Products From  **SUNWIN**

# FOSKI

Calcium Acetate 667mg **Tablets**

Achieving new level of **phosphate control**

Controls hyperphosphatemia in end stage renal failure

Combines with dietary phosphate to form insoluble calcium phosphate which is excreted in the feces

Highly soluble at neutral pH, making the calcium readily available for binding to phosphate in the proximal small intestine

FEELING THE HEAT OF  
GOUT FLARES?

# Fabset-40

Febuxostat Tablets 40mg

FOR BETTER CONTROL ON GOUT

## FEBUXOSTAT

- A xanthine oxidase inhibitor used for treating gout caused by excessive levels of uric acid in the blood.
- Prevents the production of uric acid by blocking the activity of the enzyme xanthine oxidase that converts purines to uric acid.
- More effective in reducing uric acid levels than Allopurinol.
- It was approved by the US Food and Drug Administration (FDA) in early 2009 for the chronic management of hyperuricemia in patients with gout.

Medscape Rheumatology, 2011

# FRUCTORTHO

CALCIUM FRUCTOBORATE + HYALURONIC ACID + VITAMIN D3 + **TABLETS**  
CURCUMIN + VIT K27(AS VITA MK7) + TABLETS

### CALCIUM FRUCTOBORATE

A unique and clinically proven mineral complex originally discovered in plants that support joint health. Calcium Fructoborate is also thought to help support healthy vitamin D levels, which are needed to help the body absorb calcium.\*

### HYALURONIC ACID

It reduces or relieves inflammation caused by wearing of the cartilage and bone in osteoarthritis joints. \*

### VITAMIN D3

Getting enough Vitamin D3 from food alone can be difficult. Vitamin D3 supports calcium absorption and is essential for the maintenance of healthy bone mineralization.\*

### CURCUMIN

- \* A potential time tested anti-inflammatory agent for osteoarthritis.
- \* Curcumin is a NF-KB suppressor, prevent apoptosis of chondrocytes.
- \* Inhibits release of cyclooxygenase and prostaglandins.
- \* Effectively reduces pain, physical functions and quality of life among osteoarthritis patient.

### VIT K27 (AS VITA MK7)

This is one of the clinically studied forms of Vitamin K. Vitamin K2 as MK-7 has higher bioavailability and plays an important role in supporting bone mass and structure.\*

Free You patients from Tinea infection, Onychomycosis & Balanitis

Quality Products from 

# FLUCONATE-150

Fluconazole 150mg

Tablets

- ▶ Wider range of activity than ketoconazole
- ▶ Achieves high concentration

*A Cool Combination to  
Treat Burning Condition.....*

# GELUCOOL Syrup PLUS

Dried Aluminium Hydroxide,  
Magnesium Hydroxide with  
Activated Dimethicone  
Suspension

## Magnesium Hydroxide & Dried Aluminium Hydroxide

- In combination forms an effective buffer and keeps the stomach pH within acceptable and comfortable limits.
- Forms a diffuse coating the inflamed gastric mucosa for a variable period of time allowing oxethazaine to exert a prolonged topical anaesthetic action.
- Stimulates production of cytoprotective prostaglandin thus provides mucosal protection & soothes the mucosa.

## Dimethicone

Lowers the surface tension of gas bubbles thereby bringing smaller bubbles to combine to form larger bubbles.  
Eases and fastens the expulsion of gas from the gastro intestinal tract (GIT).

## INDICATIONS

- ◀ GERD
- ◀ Gastrics
- ◀ Dyspepsia
- ◀ Flatulence
- ◀ Heart Burn
- ◀ Peptic Ulcers
- ◀ Hyper Acidity
- ◀ Hiatus Hernia

In the management of acute severe **ASTHMA**

# **LEVOBRATE** **0.63**

**LEVOSALBUTAMOL 0.63 MG**

**RESPULES**

Levosalbutamol compared to racemic salbutamol has better efficiency and safety profile.

Levosalbutamol sulphate is a relatively beta-2 adrenergic agonist, whose activation leads to an increase in intracellular adenylylcyclase the enzyme which catalyses the conversion of adenosine triphosphate (ATP) to cyclic-3, 5 adenosine monophosphate (cAMP).

Ipratropium bromide is an anticholinergic (parasympatholytic) agent, which inhibits vagally-mediated Reflexes by antagonizing the action of acetylcholine the transmitter agent released from the vagus nerve.

Allowing effects on both Muscarinic and beta-2 adrenergic receptor in the lungs leading to increased bronchodilation over that provided by each agent singly.

Effectively reduces hospitalisation and improves pulmonary function :  
"A single dose of combination therapy and multiple doses both showed reductions in the risk of hospitalisation among adults with acute asthma

Overall lung coverage due to different sites of action  
Ipratropium & levosalbutamol

# ORTHOEGG

Natural Eggshell Membrane (65%) 500mg Capsules

Eggshell membrane is semipermeable membrane around the the interior part of egg. Eggs represent one of the interior part of an egg. Eggs represent one of the most consumed, prevalent, natural food sources on the planet, In the United States alone, over 50 billion eggs are consumed on an annual basis. No matter what form of egg product is consumed, that egg originally had a shell protecting the membrane, yolki, albumen and chalaza.

What benefits can eggshell membrane have for the body? Scientific research has now confirmed that eggshell membrane contains nutrients such as chondroitin sulfate, collagen and hyaluronic acid, which may help support healthy joints and flexibility.

Where is NEM" Eggshell Membrane made? Healthy Origins" Eggshell Membrane in encapsulated and packaged in the USA using NEM" Eggshell Membrane manufactured in Missouri.

Uridine Monophosphate 9.0 Mg + Folic Acid 110.0 Mcg + Cynocobalamin 1.25 Mcg

- REDUCES PAIN INTENSITY & NEURO INFLAMATION
- NO SEDATION & DESENSITIZATION OF RECEPTORS
- SAFE FOR LONG TERM USE
- MAY IMPROVE PATIENT COMPLIANCE & QUALITY OF LIFE

**Efficacy and tolerance of combination of Cytidine 5' monophosphate (CMP) & Uridine-5' Triphosphate Trisodium (UTP) in patients with diabetic neuropathy**

#### No. of patient & trial duration:

\* 68 patients with diabetic neuropathy for 3 months

#### Method of investigation :-

- \* **Clinical** (Visual Analogous Scale, Neuropathy Disability Scale and Neuropathy Symptom Scale)
- \* **Electrophysiological** (electromyography) and
- \* **Biochemical** (liver and kidney function tests)

#### Results:

#### In Peripheral Neuropathies

- Radiculopathy
- Sciatica
- Diabetic neuropathy
- Alcoholic neuropathy
- Drug induced neuropathy

#### Conclusion

- Improvement in **Pain intensity & Sensory disorders**
- Increase in **Sensory conduction velocity** in the right median nerve and left sciatic nerves during the electromyographic tests
- No clinical or biological side effects have been noted
- The combination of CMP and UTP is useful in the treatment of diabetic neuropathy & we recommended its use for diabetic patients with neuropathy

# ACLIR-250 500

*Aciclovir Intravenous Infusion IP*

## **Aciclovir (IV)**

*A Powerful Antiviral Agent That Stops Viral Replication, Helping The Body Control And Recover From Severe Herpes-related Infections.*

## **INDICATIONS**

Treats Severe Herpes Simplex Infections.

Useful In Neonatal Herpes Management.

Prevents Viral Spread In ICU Patients.

Supports Treatment In Immune-compromised.

***Relief That Reaches Deep,  
Healing That Begins Fast***

# ASCOCRIT<sup>®</sup> Injection

*Ascorbic Acid IP*

## Ascorbic Acid

*A Potent Antioxidant That Supports Immune Health, Collagen Synthesis, And Cellular Protection Under Oxidative Stress Or Critical Conditions.*

***Fuel For Recovery,  
Strength From Within***

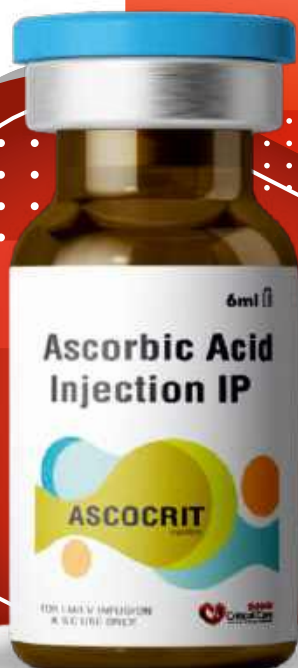

## INDICATIONS

Aids Post-operative  
Tissue Healing.

Restores Vitamin  
C During Illness.

Enhances Immune  
System Response.

Reduces Oxidative  
Cellular Damage.

# CINJECT- 100 250 500

*Amikacin Sulphate IP Range*  
**Injection**

## **Amikacin Sulphate**

*A Potent Aminoglycoside Antibiotic That Inhibits Bacterial Protein Synthesis, Effectively Targeting Gram-negative And Resistant Infections. Under Oxidative Stress Or Critical Conditions.*

## **INDICATIONS**

Treats Serious Bacterial Infections.

Effective In Sepsis And Meningitis.

Useful In Hospital-acquired Infections.

Suitable For Urinary Tract Infections.

***When Infections Turn  
Critical, Strength Begins  
With Precision***

# Artuf- 60 120

*Artesunate IP Range*  
**Injection**

## **Artesunate**

*A Water-soluble Derivative Of Artemisinin That Rapidly Kills Malaria Parasites In The Bloodstream, Reducing Parasite Load And Improving Survival Outcomes.*

## **INDICATIONS**

Treats Severe Falciparum Malaria.

Effective In Multi-drug Malaria Cases.

Reduces Complications And Mortality.

Rapid Parasite Clearance In Blood.

***When Every Second Matters Fast Relief Means Another Life Saved***

# Azicrit-250 500

*Azithromycin USP Range*

*Injection*

## **Azithromycin**

*A Long-acting Macrolide Antibiotic That Inhibits Bacterial Protein Synthesis, Offering Strong Coverage Against Respiratory, Skin, And Soft Tissue Infections.*

***When Oral Therapy Isn't Enough,  
Trusted Relief Starts With Every Vial***

## **INDICATIONS**

Suitable For Skin And Soft Tissue Use.

Supports Patients Needing Iv Therapy.

Useful For Pelvic Inflammatory Disease.

Effective In Community-acquired Pneumonia.

# Nambact-1000

*Aztreonam USP*

**Injection**

## **Aztreonam**

*A Synthetic Monobactam That Disrupts Bacterial Cell Wall Synthesis, Highly Effective Against Gram-negative Pathogens With Minimal Cross-reactivity.*

**When Precision Matters Most,  
Trust Targeted Protection  
That Never Compromises**

## **INDICATIONS**

Treats Serious Gram -  
Negative Infections

Effective In Urinary  
Tract Infections

Supports Respiratory  
Tract Infection Care

Used In Icu And  
Hospital Protocols.

# Cprime-SB 1.5

*Cefepime & Sulbactam*  
**Injection**

## **Cefepime**

*A Fourth-generation Cephalosporin With Broad-spectrum Activity Against Both Gram-positive And Gram-negative Bacteria.*

## **Sulbactam**

*A Beta-lactamase Inhibitor That Enhances Cefepime's Efficacy By Blocking Bacterial Defense Mechanisms.*

***For Infections That Fight Back,  
Here's A Combination That Fights Harder***

## **INDICATIONS**

Effective In Resistant  
Uti Treatment.

Fights Severe  
Nosocomial Infections.

Useful In Septicemia  
And Bacteremia.

Ideal For Icu And  
Critical Care Use.

# Cprime-TZ 1.25

*Cefepime & Tazobactam*  
**Injection**

## **Cefepime**

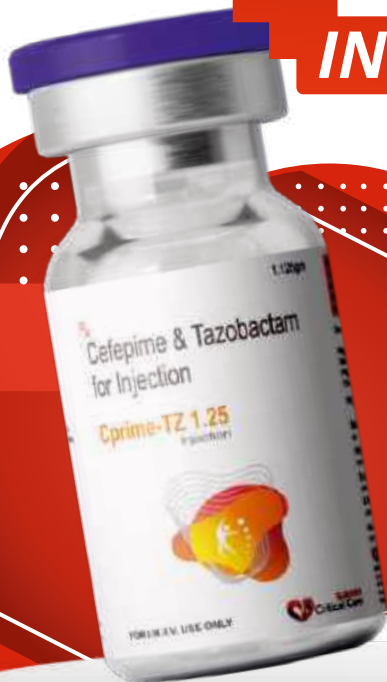

*A Fourth-generation Cephalosporin That Effectively Targets A Wide Range Of Gram-positive And Gram-negative Organisms, Including Pseudomonas.*

## **Tazobactam**

*A Beta-lactamase Inhibitor That Protects Cefepime From Enzymatic Degradation, Enhancing Its Activity Against Resistant Bacterial Strains.*

***When Infection Strikes Hard,  
Strike Back With Powerful Precision***

## **INDICATIONS**

Treats High-risk Hospital Infections.

Used In Lower Respiratory Infections.

Effective In Febrile Neutropenia Cases.

Manages Intra-abdominal Infections Well.

**SUNWIN**  
Critical Care

# ZOXPRIIME SB-1.5

*Ceftizoxime & Sulbactam 1.5 gm*

**Injection**

## **Ceftizoxime**

*A Third-generation Cephalosporin Antibiotic Effective Against Gram-negative And Gram-positive Pathogens By Inhibiting Bacterial Cell Wall Synthesis.*

## **Sulbactam**

*A Beta-lactamase Inhibitor That Enhances The Efficacy Of Ceftizoxime By Neutralizing Resistance Enzymes, Expanding Antibacterial Coverage.*

**Stronger Together—Because Smart Combinations Save Precious Time**

## **INDICATIONS**

Useful In Skin And Soft Tissue Cases

Ideal For Hospital-acquired Infections

Suitable For Intra-abdominal Infections

Effective In Lower Respiratory Infections

**SUNWIN**  
Critical Care

# CEFPREX SB 750

Ceftriaxone 500 mg  
+ Sulbactam 250 mg

**Injection**

## Ceftizoxime

A Third-generation Cephalosporin Antibiotic.  
Works By Stopping Bacterial Cell Wall Synthesis.

## Sulbactam

A Beta-lactamase Inhibitor. Prevents  
Bacteria From Destroying Antibiotics.

## INDICATIONS

Skin And Soft Tissue Infections

Respiratory Tract Bacterial Infections

Urinary Tract Bacterial Infections

Intra-abdominal Bacterial Infections

Also Available

**CEFPREX 250 | 500**  
Ceftriaxone 250 | 500 mg

**CEFPREX 1 GM**  
Ceftriaxone 1000 mg

**CEFPREX 2 GM**  
Ceftriaxone 2000 mg

**CEFPREX SB 750**  
Ceftriaxone 500 mg + Sulbactam 250 mg

**CEFPREX SB 1.5**  
Ceftriaxone 1 gm + Sulbactam 500mg

**CEFPREX SB 375**  
Ceftriaxone ip 250 mg + Sulbactum 125

# CEFPREX TZ

*Ceftriaxone + Tazobactam*

*Injection*

281.25 312.5

1.125 GM

## **Ceftriaxone**

*A Third-generation Cephalosporin Antibiotic Effective Against A Wide Range Of Bacteria.*

## **Tazobactam**

*A B-lactamase Inhibitor That Enhances The Spectrum Of Ceftriaxone By Preventing Resistance.*

## **INDICATIONS**

Severe Respiratory Tract Infections

Complicated Urinary Tract Infections

Intra-Abdominal Bacterial Infections

Skin And Soft Tissue Infections

***Combining Strength  
for Faster Healing***

# ROXICRIT 1.5 GM 750

*Cefuroxime Range*

**Injection**

## **Cefuroxime**

*A Second-generation Cephalosporin Antibiotic For Broad-spectrum Bacterial Infections. effective In Treating Respiratory, Urinary, And Skin Infections.*

## **INDICATIONS**

Respiratory Tract Infections

Skin And Soft Tissue Infections

Urinary Tract Infections

Bone And Joint Infections

**Trust The Strength  
Of Proven Protection**

# COGNIP 60

*Cerebroprotein 60 mg* **Injection**

## *Cerebroprotein*

*Contains Amino Acids And Peptides Derived From Animal Brain Tissue.  
Supports Neuronal Repair And Metabolic Processes In The Brain.*

***Excellence In Every Dose,  
Commitment In Every Batch***

## **INDICATIONS**

Supports Recovery After Stroke

Aids Healing From Brain Injury

Enhances Brain Metabolic Activity

Improves Cognitive Function Disorders

**SUNWIN**  
Critical Care

# CLARIGHT-500

Clarithromycin for Infusion BP **Injection**

## Clarithromycin

A Semi-synthetic Macrolide Antibiotic That Works By Inhibiting Bacterial Protein Synthesis, Thereby Preventing Growth And Multiplication Of Bacteria.

*Delivering High-quality,  
Effective Care With Trusted  
Protection For Every Patient*

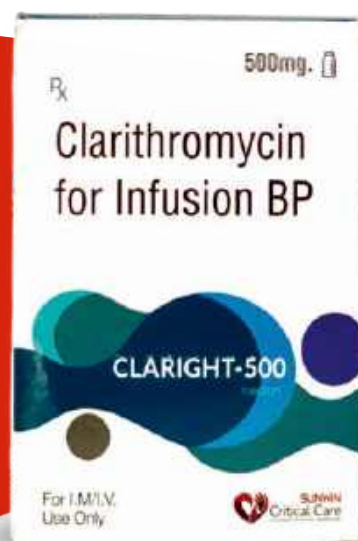

## INDICATIONS

Lower Respiratory Tract  
Bacterial Infections.

Ear, Nose And  
Throat Infections.

Skin And Soft  
Tissue Infections.

Upper Respiratory Tract  
Bacterial Infections.

# DRINEM-500

Doripenem for **Injection**

**Doripenem**

A  $\beta$ -lactam carbapenem antibiotic that inhibits bacterial cell wall synthesis, leading to rapid bacterial cell death.

**High-quality Medicine  
Ensures Trusted Patient Care**

## INDICATIONS

Complicated Intra-Abdominal Infections.

Hospital-acquired  
Pneumonia Treatment.

Complicated Urinary  
Tract Infections.

Ventilator-Associated  
Pneumonia Cases.

# PRINEX 40 60

*Enoxaparin Sodium IP*  
60mg/0.6ml | 40mg/0.4ml

*Injection*

*A Trusted Low Molecular Weight Heparin For  
Reliable Clot Prevention And Treatment.*

## *Enoxaparin Sodium*

*An Anticoagulant That Inhibits Clotting Factors  
And Prevents Formation Of Harmful Blood Clots.*

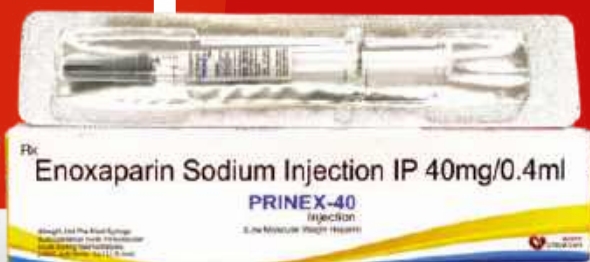

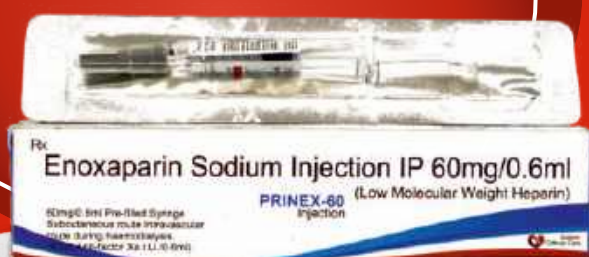

## *INDICATIONS*

Prevents Deep Vein Thrombosis

Prevents Post-surgical Blood Clots

Reduces Pulmonary Embolism Risk

Manages Unstable Angina Cases

# CEFPREX TZ

*Ceftriaxone + Tazobactam*

*Injection*

281.25 312.5

1.125 GM

*An Effective Antiemetic For The Prevention And Control Of Nausea And Vomiting Associated With Chemotherapy, Radiotherapy, And Surgery.*

## **Granisetron Hydrochloride**

*A Selective 5-HT<sub>3</sub> Receptor Antagonist That Blocks Serotonin Activity In The Brain And Gut To Prevent Nausea And Vomiting.*

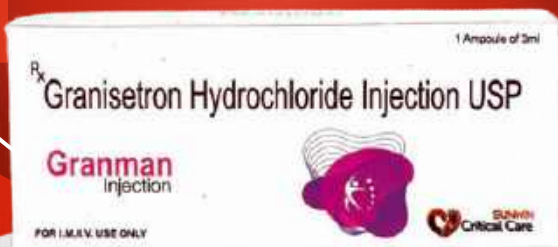

## **INDICATIONS**

Prevents Chemotherapy-Induced Nausea

Controls Radiotherapy-Related Vomiting

Manages Postoperative Nausea Episodes

Improves Patient Comfort Levels

***Fast Relief, Greater Comfort Assured***

# Rinthin 25000 5000

Heparin I.P Range Injection

*An Effective Anticoagulant Used To Prevent And Treat Blood Clot Formation In Various Medical Conditions.*

## Heparin Sodium

*A Fast-acting Anticoagulant That Enhances Antithrombin III Activity, Thereby Preventing Clot Formation And Extension.*

## INDICATIONS

Prevents Deep Vein Thrombosis

Treats Pulmonary Embolism Cases

Prevents Clotting During Surgery

Manages Unstable Angina Episodes

**Trusted Protection  
Against Harmful Clots**

# KETOPACE

*Ketorolac Tromethamine I.P*

**Injection**

*A Potent Non-steroidal Anti-inflammatory Drug (NSAID) Used For Short-term Management Of Moderate To Severe Pain.*

## **Ketorolac Tromethamine**

*A Strong Analgesic And Anti-inflammatory Agent That Reduces Pain, Swelling, And Discomfort By Inhibiting Prostaglandin Synthesis.*

**Powerful Relief,  
Trusted Performance**

## **INDICATIONS**

Relieves Post-operative Pain

Provides Short-term Pain Relief

Manages Musculoskeletal Pain

Controls Acute Inflammatory Pain

# BITLOL

*Labetalol Injection I.P*

## **Labetalol Hydrochloride**

*A Combined A And B-adrenergic Blocker That Lowers Blood Pressure Without Significantly Reducing Heart Rate Or Cardiac Output.*

## **INDICATIONS**

Controls Hypertensive Crisis With Rapid Response.

Treats Pregnancy-induced Hypertension With Safety.

Lowers Blood Pressure During Surgical Procedures.

Provides Reliable And Fast Antihypertensive Effect.

***Fast Relief, Safe Blood Pressure Control***

**SUNWIN**  
Critical Care

# Encrit

Acetylcysteine BP **Injection**

*A Mucolytic And Antioxidant Agent Widely Used For Respiratory Support And As An Antidote In Acetaminophen Overdose.*

## Acetylcysteine

*Breaks Down Thick Mucus In The Airways And Replenishes Glutathione Levels For Detoxification.*

**Relief, Protection, And Trusted Care**

## INDICATIONS

Breaks Down Mucus In Lung Diseases

Provides Antioxidant Support Critical Illness

Prevents Kidney Injury From Contrast Agents

Improves Breathing In Chronic Respiratory Conditions.

# VANSTAR

*Vancomycin Hydrochloride for I.P*

**Injection**

## **Vancomycin Hydrochloride**

*Inhibits Bacterial Cell Wall Synthesis,  
Making It Highly Effective Against Gram  
- Positive Bacteria, Including MRSA.*

**High Quality Antibiotic  
For Toughest Infection**

## **INDICATIONS**

Manages Complicated Skin  
And Soft Tissue Infections.

Used In Bacterial Endo-  
carditis For Reliable Care.

Effective In Bone And Joint  
Bacterial Infections.

Prevents Infections In  
High-risk Surgical Patients.

# ONIFER MAX

*Ferric Carboxymaltose  
(500 mg / 10 ml)*

*Injection*

*An Intravenous Iron Preparation Designed For Rapid And Effective Treatment Of Iron Deficiency And Iron Deficiency Anemia.*

## *Ferric Carboxymaltose*

*A Stable, Non-dextran Iron Complex That Allows High-dose Administration With Improved Safety And Tolerability.*

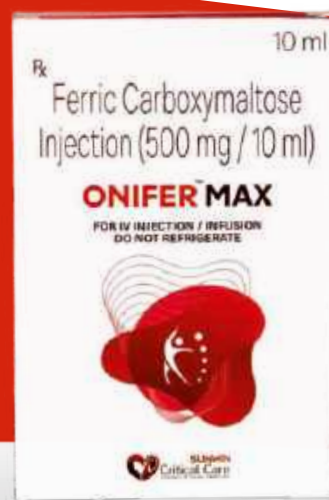

## *INDICATIONS*

Treats Iron Deficiency Anemia Efficiently

Restores Iron Levels In Postpartum Women

Corrects Anemia In Chronic Kidney Disease

Effective In Anemia Due To Heart Failure

# PIPWAR 4.5 2.25

*Piperacillin & Tazobactam I.P Range*  
**Injection**

## **Piperacillin**

*An Extended-spectrum Penicillin Antibiotic  
That Inhibits Bacterial Cell Wall Synthesis.*

## **Tazobactam**

*A B-lactamase Inhibitor That Protects Piperacillin From  
Enzymatic Breakdown, Enhancing Its Antibacterial Activity.*

## **Powerful Protection Against Resistant Infections**

## **INDICATIONS**

Complicated Urinary Tract Infections

Complicated Intra-abdominal Infections

Community-acquired Severe Pneumonia

Septicemia And Bloodstream Infections

# POLYMIXATE

Polymyxin B for IP **Injection**

## Polymyxin B

*A Potent Polypeptide Antibiotic That Binds To Bacterial Cell Membranes, Increases Permeability, And Causes Rapid Cell Death*

**Delivering Trusted Quality In Critical Moments,  
Where Only The Strongest Defense Matters**

## INDICATIONS

Multidrug-Resistant Gram-Negative Infections.

Severe Hospital-Acquired Bacterial Pneumonia.

Bloodstream Infections Including Septicemia.

Life-Threatening Resistant Bacterial Infections.

**SUNWIN**  
Critical Care

# TPLAN 200 400

Teicoplanin IP 200 | 400 mg

Injection

## Teicoplanin

*A Potent Glycopeptide Antibiotic That Inhibits Bacterial Cell Wall Synthesis. especially Active Against Staphylococcus Aureus, Enterococcus, And Other Resistant Gram-positive Organisms.*

## INDICATIONS

Gram-positive Bacterial Infections

Complicated Skin And Soft Tissue Infections

Bloodstream Infections Including Sepsis

Bone And Joint Infections Treatment

**High-Quality Protection  
Against Resistant Infections  
- Trusted In Critical Care**

# TUBACIN

*Tobramycin* **Injection**

## **Tobramycin**

*An Aminoglycoside Antibiotic Widely Used For The Management Of Severe Bacterial Infections Caused By Susceptible Gram-negative Organisms.*

**Trusted Aminoglycoside Strength  
For Reliable Infection Control**

## **INDICATIONS**

Severe Gram-Negative  
Bacterial Infections

Complicated Urinary  
Tract Infections

Bloodstream Infections  
Including Sepsis

Intra-Abdominal &  
Skin Infections

# TRILON-40

Triamcinolone Acetonide I.P **Injection**

*A Long-acting Corticosteroid Preparation Used To Reduce Inflammation And Provide Relief In Various Allergic And Musculoskeletal*

## Triamcinolone Acetonide

*A Synthetic Corticosteroid With Strong Anti-inflammatory, Antiallergic, And Immunosuppressive Properties.*

**Stronger Together—Because Smart Combinations Save Precious Time**

## INDICATIONS

Joint And Soft Tissue Inflammation

Rheumatoid Arthritis And Osteoarthritis

Skin Disorders Like Psoriasis, Dermatitis

Autoimmune Connective Tissue Diseases

# PREDCRIT Injection

*Methylprednisolone Sodium Succinate USP Range*

## **Methylprednisolone Sodium Succinate**

*A Synthetic Glucocorticoid With Strong Anti-inflammatory, Anti-allergic, And Immunosuppressive Properties.*

- *Rapid Onset Of Action Makes It Highly Effective In Emergency And Critical Care Situations.*

***Powerful Relief, Rapid Action  
- Trusted In Emergencies***

## **INDICATIONS**

Severe allergic and anaphylactic reactions

Acute spinal cord injury support

Acute asthma and COPD exacerbations

Cerebral edema due to trauma/tumor

Also Available

**PREDCRIT 1 GRAM**  
Methylprednisolone 1 gram

**PREDCRIT 500**  
Methylprednisolone 500 mg

**PREDCRIT 125**  
Methylprednisolone 125 mg

**PREDCRIT 80**  
Methylprednisolone 80 mg

**PREDCRIT 40**  
Methylprednisolone 40 mg

# IPCEL

1000/1000

500/500

*Imipenem & Cilastatin I.P. Range  
Injection*

## Imipenem

*A Carbapenem Antibiotic With Strong Activity Against A Wide Range Of Gram-positive And Gram-negative Bacteria.*

## Cilastatin

*A Renal Dehydropeptidase Inhibitor That Prevents The Breakdown Of Imipenem In The Kidneys, Enhancing Its Efficacy And Duration Of Action.*

## INDICATIONS

Severe Respiratory Tract Infections

Complicated Urinary Tract Infections

Intra-Abdominal Bacterial Infections

Septicemia And Hospital-Acquired Infections

# TIGIS-50

Tigecycline USP

Injection

**Tigecycline**

*A Semisynthetic Derivative Of Minocycline, Designed To Overcome Bacterial Resistance Mechanisms. offers Potent Activity Against Gram-positive, Gram-negative, Anaerobic, And Atypical Pathogens.*

**Trusted Choice Against Resistant Infections**

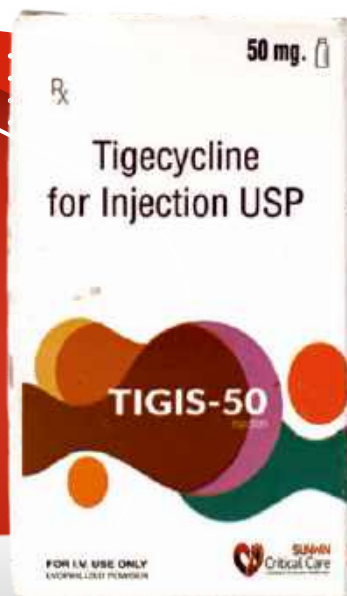

## INDICATIONS

Complicated Skin & Soft Tissue Infections

Community-Acquired Bacterial Pneumonia

Resistant Gram-Positive Bacterial Infections

Complicated Intra-Abdominal Infections

# WINART

*$\alpha$ -B Arteether*

*Injection*

*A Fast-acting Antimalarial Injection, Widely Used For The Treatment Of Severe And Drug-resistant Malaria.*

## *$\alpha$ -Beta Arteether*

*A Semisynthetic Derivative Of Artemisinin, Extracted From Artemisia Annuua. Known For Its Potent Schizontocidal Action Against Plasmodium Falciparum And Other Malarial Parasites.*

*Swift Action, Trusted Relief In Malaria Care*

## INDICATIONS

Severe Falciparum  
Malaria Treatment

Multidrug-resistant  
Malaria Infections

Rapid Parasite  
Clearance Therapy

Complicated Acute  
Malaria Cases

# Livoden

*L-Ornithine L-Aspartate* **Injection**

## **L-ornithine**

*An Amino Acid Derivative That Aids In The Urea Cycle, Enhancing Ammonia Detoxification.*

## **L-aspartate**

*Supports Energy Metabolism And Promotes Liver Cell Regeneration.*

## **INDICATIONS**

Reduces Elevated Blood Ammonia Levels

Aids Treatment In Chronic Liver Disease

Beneficial In Acute Viral Hepatitis

Promotes Detoxification And Liver Function

*Caring For The Liver,  
Supporting Life's Balance*

# VIPRESS

*Vasopressin I.P.* **Injection**

## *Vasopressin*

*A Synthetic Analogue Of The Natural Antidiuretic Hormone,  
Used For Therapeutic And Emergency Purposes.*

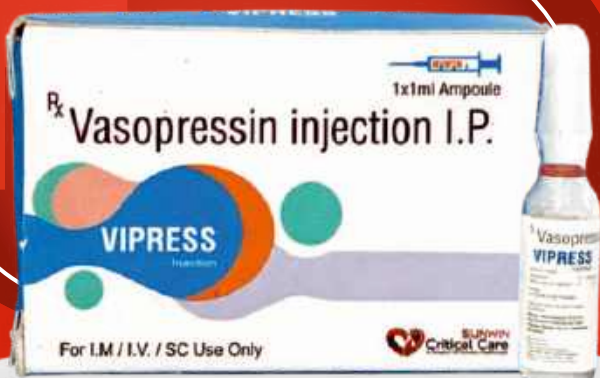

## **INDICATIONS**

Controls Bleeding From Esophageal Varices

Manages Diabetes Insipidus With Polyuria

Treats Vasodilatory Shock And Hypotension

Supportive In Advanced Cardiac Arrest

*Reliable Care, When  
Every Second Counts*

# CLINDAMET 300 600

Clindamycin I.P. **Injection**

*A Broad-spectrum Antibiotic Effective Against Serious Bacterial Infections.*

## **Clindamycin Phosphate**

*A Lincosamide Antibiotic That Works By Inhibiting Bacterial Protein Synthesis, Providing Strong Action Against Anaerobic And Aerobic Gram-positive Organisms.*

## **INDICATIONS**

Severe Respiratory Tract Infections

Gynecological Infections Management

Intra-Abdominal Infections Treatment

Skin And Soft Tissue Infections

# Meronate

*Meropenem & Sulbactam*

*Injection*

125

1GM

SB-1.5

## **Meropenem**

*Broad-spectrum Carbapenem Antibiotic That Inhibits Bacterial Cell Wall Synthesis.*

## **Sulbactam**

*B-lactamase Inhibitor That Enhances And Extends Meropenem's Antibacterial Action.*

## **INDICATIONS**

Severe Skin And Soft Tissue Infections

Lower Respiratory Tract Infections

Complicated Urinary Tract Infections

Septicemia And Bloodstream Infections

**Advanced Combination  
Therapy For Reliable  
Infection Control**

**SUNWIN**  
Critical Care

# AMPINT

*Ampicillin & Sulbactam* Injection

## **Ampicillin**

*A Broad-spectrum B-lactam Antibiotic That Works By Inhibiting Bacterial Cell Wall Synthesis.*

## **Sulbactam**

*A B-lactamase Inhibitor That Protects Ampicillin From Degradation And Broadens Its Antibacterial Spectrum.*

**Trusted Strength And Enhanced Protection In Every Dose**

## **INDICATIONS**

Severe Respiratory Tract Infections

Complicated Urinary Tract Infections

Intra-abdominal Bacterial Infections

Gynecological Infectious Conditions

# GLUTAFUSE

*L-Alanyl-L-Glutamine (20% w/v)*

*Infusion*

## *L-alanyl-l-glutamine*

*A Dipeptide That Delivers Glutamine Efficiently,  
Supporting Tissue Repair, Immune Function,  
And Nitrogen Balance In Stressed Conditions.*

## INDICATIONS

Supports Recovery  
In Critical Illness

Preserves Gut  
Barrier And Function

Enhances Immune  
Defense In ICU

Aids Post-surgery  
Nutritional Support

*Fuel For Recovery,  
Strength From Within*

# LEVOGAIN-IV

*Levofloxacin Infusion IP*

## Levofloxacin

*A Potent Fluoroquinolone Antibiotic That Inhibits Bacterial Dna Replication, Making It Effective Against A Wide Range Of Gram-positive, Gram-negative, And Atypical Pathogens.*

***Fast Action. Broad Coverage.  
Trusted Clinical Results***

## INDICATIONS

Treats community acquired pneumonia

Manages complicated urinary infections

Controls acute bacterial sinusitis

Treats chronic bronchitis exacerbations

# LINKZID-IV

*Linezolid Infusion 600 mg/300 ml*

## **Linezolid 600**

*A synthetic antibiotic that works by inhibiting bacterial protein synthesis, effective against multidrug-resistant organisms including MRSA and VRE*

## **INDICATIONS**
